About Coventry City Council

Who we are: At Coventry City Council we are dedicated to making a positive difference to the services we deliver to the diverse citizens of Coventry. The work we do improves people's lives – from helping them into work to providing clean and green places to live, to keeping people safe and protected.

As a Coventry City Council employee, you have our ongoing commitment to your growth and development with opportunities to work across multiple service areas including customer contact, public health prevention and education and skills, adults and children's services and provide support for the most vulnerable.

Our aim is simple – to be globally connected, locally committed, deliver our priorities with fewer resources whilst effectively managing our performance and measuring our progress.

Our Values: We expect everyone who works for us to be committed to our One Coventry values and to share our commitment to becoming a more diverse and inclusive organisation:

About the Service your team will provide

The Digital Delivery Team is responsible for leading One Coventry digital transformation programmes, in particular Coventry Connects and the Digital Workplace programmes, with a strong focus on delivering against the Council's Medium Term Financial Strategy.

The Digital Delivery Team comprises the Business Analysis, Project Management, Testing and Implementation resources to support this work.

The Business Analysts will work across the full range of Council services to ensure they gain maximum benefit from the digital technology products and services supplied and available, whilst adhering to the Corporate Digital Strategy, the People Plan and the principles of standardising and simplifying processes and technologies.

Main Duties & Key Accountabilities

- Support the Digital Delivery Manager and Strategic Lead – Digital Delivery in overseeing the identification of new and alternative approaches to performing business activities.

- Recommend and implement standards, approaches and methods for digital business analysis and service redesign activities to ensure consistency and quality.

- Plan and estimate timelines for business analysis activities within projects, capital and revenue costs involved and resourcing needs.

- Contribute to the creation of bids to secure project and ongoing funding from internal and external sources.

- Carry out the methodical investigation, review and documentation of all or part of the Council's business in terms of business functions and processes, the information used and the data on which information is based.

- Identify opportunities for the improvement or automation of business processes, capture of business requirements, assessment of costs and potential benefits of new approaches considered and support to implementation.

- Working with suppliers and Digital Services colleagues, produce protypes and models to represent business situations to aid the communication and understanding of existing, conceptual or proposed solutions.

- Prepare documentation to aid decision making such as business cases, feasibility studies, cost benefit analyses and options papers, specifying required changes to business processes, people skills, digital technology and roles.

- Create viable functional specifications and acceptance criteria for the construction, change or procurement of ICT systems.

- Attend project boards, steering groups, procurement governance boards and political management meetings to obtain approvals and provide updates.

- Work collaboratively with business users, third parties and Digital Services colleagues throughout the systems implementation lifecycle, including testing with users to ensure effective execution of the acceptance tests.

- Support the Project Managers in the capture and reporting of benefits realised from system and process changes.

- Manage a small team of Digital Business Analysts, setting priorities and monitoring and applying standards of performance.

- Assist the Digital Delivery Manager with the development of staff in the team, aligning working practices and behaviours to model the organisational values.

- Keep up to date with current research, ensuring the Digital Delivery team is fully briefed on new technologies and communication tools

- Ensure a high standard of customer care and confidentiality at all times, ensuring compliance with the UK Data Protection Act and other relevant standards and protocols.

- Any other duties and responsibilities within the range of the salary grade.
