

“

As a Team Manager, I've been fortunate enough to line manage three apprentices within the Business Systems Team. The value they bring to our team is amazing and, in turn, we support them to work through their coursework as well as gaining valuable experience within a systems team. This experience can then assist them in securing a permanent position within the Council and gives them a starting point to further develop in their career. I'm so proud of our apprentices as they've all completed their apprenticeships and secured permanent roles. Our team always work with our apprentices to share knowledge and develop skills which will be useful for a number of positions across the Council.

”

Karyn

Business Systems Manager (Childrens)
